IMPLEMENT YOUR OWN PING PROGRAM

AIM:-

To implement a ping program using python to check network connectivity and measure response time.

CODE:-

```
import os
import platform
import subprocess
def ping(host = "google.com", count = 4):
    param = "-n" if platform.system().lower() == "windows" else "-c"
    command = ["ping", param, str(count), host]
    try:
        output = subprocess.check_output(command, universal_newlines = True)
        print(output)
    except Exception as e:
        printf(f"Ping failed: {e}")
if __name__ == "__main__":
    ping("8.8.8.8")
```

OUTPUT:-

Pinging 8.8.8.8 with 32 bytes of data :

Reply from 8.8.8.8 : bytes = 32 time = 6ms TTL = 119

Reply from 8.8.8.8 : bytes = 32 time = 9ms TTL = 119

Reply from 8.8.8.8 : bytes = 32 time = 5ms TTL = 119

Reply from 8.8.8.8 : bytes = 32 time = 9ms TTL = 119

Ping statistics for 8.8.8.8 :

Packets : Sent = 4, Received = 4, Lost = 0 (0% loss),

Approximate round trip times in milliseconds :

Minimum = 5ms, Maximum = 9ms, Average = 7ms

RESULT:-

Thus the ping program was implemented successfully, displaying reply times, packet loss, and round-trip statistics.
